

## **Hunt Mining Commences Resource Confirmation Program at La Josefina in Santa Cruz Argentina**

Liberty Lake, Washington, March 4<sup>th</sup>, 2010 - Hunt Mining Corp. (the "Corporation") (TSX VENTURE:HMX), is pleased to announce that Cerro Cazador S.A. (CCSA), its wholly owned Argentine subsidiary, has engaged UAKO Consultora Geologica, a San Juan Argentina based mining services provider to complete several projects that will advance the Corporations' progress in Santa Cruz Argentina. Hunt Mining is engaged in the development of the advanced La Josefina gold/silver project and the ongoing exploration of six additional prospective precious metal assets.

Contracted "arms-length" projects will include: Quality Assurance and Control of Analysis Results Program (QA/QC), National Instrument 43-101 compliant technical reports for the Bajo Pobre Project, El Gateado Project and the La Josefina Project. The latter will include preliminary resource calculations and resource expansion recommendations. UAKO will also be contracted to provide ongoing QA/QC for Hunt Mining Corp as the company nears a production decision and initiates project feasibility for La Josefina expected later in 2010.

UAKO conducts a wide range of geological services which are managed and directed by Qualified Persons (QP) under the Canadian national instrument 43-101 definitions. A short list of their clients includes Intrepid Mines, Buenaventura S.A.A., Mansfield Minera Inc. and Patagonia Mining.

The Corporation is completing resource estimates for five mineralized shoots recognized from both historic drilling and core-drilling/result-compilation completed in 2009. UAKO will be reviewing this work and completing its own analysis to update the company's current 43-101 technical report for La Josefina. Expected for resource inclusion are mineralized shoots from the Veta Cecilia, Veta Amanda, Veta Sur, Veta Ailin and the Sinter Zone targets, all of which remain open to expansion. Selected results from these areas include:
